

ACKNOWLEDGEMENTS

We would like to thank our advisory committee members for all their assistance and valuable insight. Personnel associated with the Albemarle-Pamlico Estuarine Study were supportive and helpful, especially Dr. Randall Waite, Project Director, and Ted Bisterfeld of the EPA. We also appreciate all the time and information provided by the respondents from both the telephone and mail interviews. Dr. Yevonne Brannon and the staff of the Center for Urban Affairs at NCSU provided expert service in collection and processing of the survey data. We acknowledge the valuable advice and assistance provided with economic analysis by Dr. John Whitehead of East Carolina University. We also acknowledge the professional competence and support of our secretaries Tammy Hinton and Judy Cline. Support from the NCSU Department of Sociology, the NCSU College of Agriculture and Life Sciences, and the UNC Sea Grant Program are appreciated.
